

2021 Water, Wastewater, Pavement Improvements Project

This year's annual Water, Wastewater, Pavement Improvements Project construction contract was awarded to Pipher Corporation. Dudek Associates will be performing Construction Management oversight and inspections for the City.

The original project scope was reduced due to COVID19 budget and staffing reductions. Water and Wastewater improvements are limited to addressing essential "high risk" needs. Paving repairs are limited to pipeline resurfacing; flood prevention; and essential roadway repairs.

Anticipated 2021 Work Area Schedule
